WeRateDogs (@dog_rates), a Twitter account with over 4 million followers, has gained global media recognition due to its funny dog ratings and comments. The ratings usually have a denominator of 10 and numerators above 10 e.g. 11/10, 12/10, 13/10, etc. I gathered, assessed, cleaned, and combined three different datasets from @dog_rates, and created interesting insights and visualizations from it.
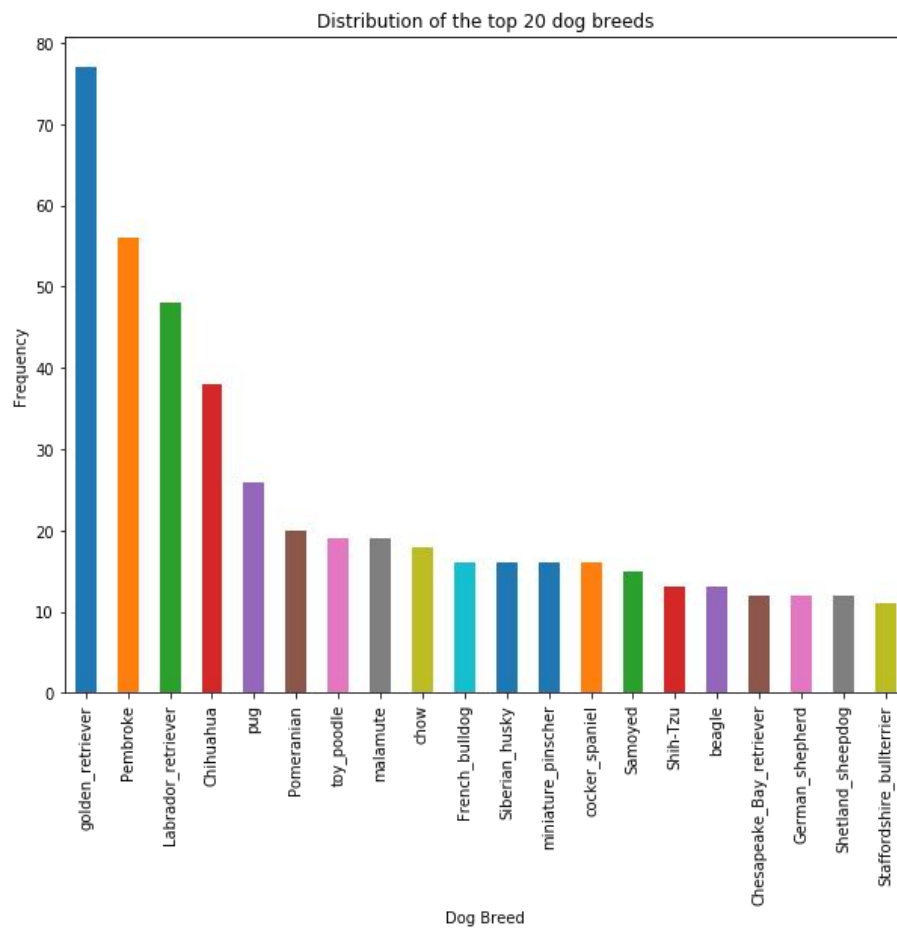

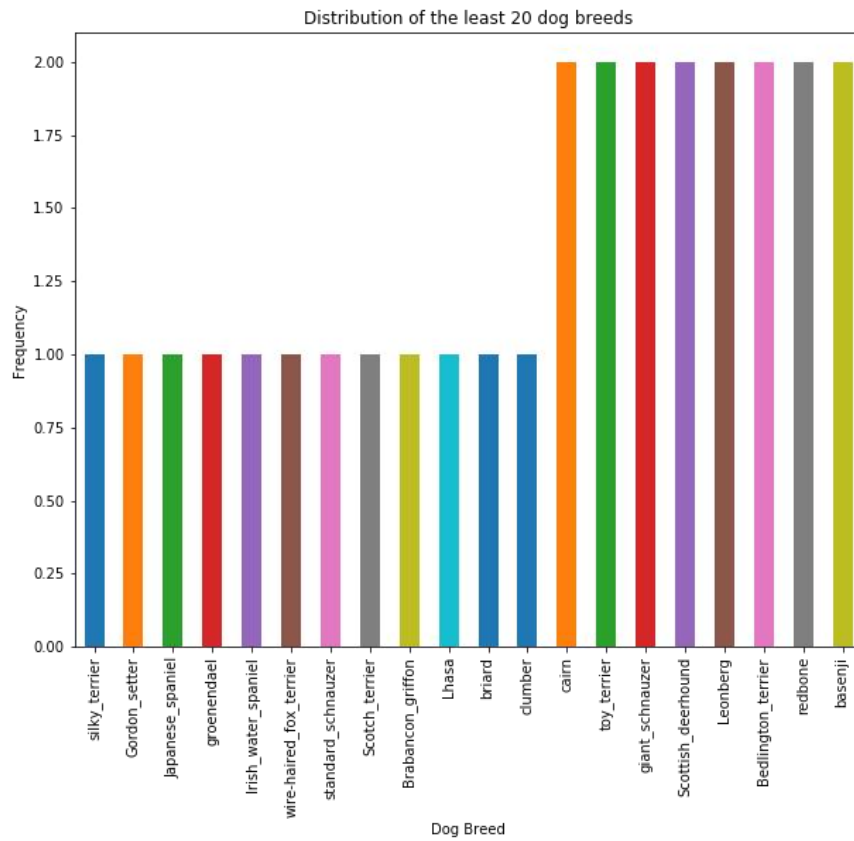

The most common dog name:

Data analysis and visualization of the cleaned data showed that the top 5 most common dog names in the WeRateDogs dataset were Cooper with 9 dogs bearing the name, Charlie and Oliver, with 7 dogs each bearing the names, and Sadie, and Koda, with 6 dogs each bearing the names. Some of the least common dog names include: Brudge, Arlen, Tonks, Orion, Dot, Jed, and Dotsy.

Top 20 most common dog names

The most common and least common dog breeds:

The data also contains the dog breeds. The most common dog breed is the Golden Retriever, while the least common dog breeds are the silky terrier, gordon setter, japanese spaniel, groenendael, irish water spaniel, wire haired fox terrier, standard schnauzer, scotch terrier, brabancon griffon, lhasa, briard, and dumber.
